Education

Texas A&M University College Station, TX

Bachelor of Science in Electrical Engineering, Minor in Mathematics *Graduation May 2028*

- **Coursework:** Digital Systems Design, Machine Learning for EE, Electrical Circuit Theory, Signals and Systems, Computer Architecture & Design, Random Signals and Systems, Program Design and Concepts, Differential Equations, Engineering Math I–III

Experience

Software Developer Intern June 2026 – August 2026

American Airlines *Fort Worth, TX*

- Built a full-stack operations dashboard (Next.js 15, React 19, TypeScript) delivering real-time visibility into **5,000+** cameras across **100+** sites in American Airlines' network
- Integrated **4** REST APIs (Dynatrace, Nucleus, BigPanda, Avigilon Alta), consolidating system health, security risk, and incident data into a centralized view
- Designed a VMS Performance Metrics dashboard with **15+** live metrics and automated alerts, reducing manual incident investigation time by **40%** for **10+** daily users
- Supported VMS platform migration across **20+** locations, running network assessments and infrastructure coordination with **minimal** unplanned monitoring downtime

Tutor January 2026 – Present

Tutor Pritch *College Station, TX*

- Tutor students in mathematics, computer science, and engineering coursework, adapting explanations and problem-solving strategies to individual learning needs

Intern (Remote) June 2023 – August 2023

e24 Technologies *Sammamish, WA*

- Researched and applied AI/ML techniques in Python, working with database management systems to support data-driven features
- Designed and implemented a chatbot with AI/ML-driven response logic to enhance user experience

Projects

Low-Cost Intelligent Hearing Aid | *Arduino, Analog Circuit Design, Signal Processing* 2026

- Programmed Arduino Mega for UI control, EEPROM settings storage, and SPI communication with digital potentiometers
- Developed affordable hearing aid with 4-band analog frequency filter and adjustable digital gain control

Dog Daycare Management App | *Java, JavaFX, MySQL* 2024

- Designed and built a booking management system for a small business client, applying the Singleton pattern, SMTP email notifications, lambda-based search, and input validation
- Deployed the app for real-world use by the client, applying complex SQL joins and queries to manage **100+** bookings and pet profiles across multiple businesses

Leadership

TAMUhack — Logistics Director April 2026 – Present

College Station, TX

- Coordinating logistics for TAMUhack 2027, one of the university's largest annual hackathons
- Supporting an event that hosted **484** in-person hackers from **27** schools in 2026, amid a record **1,554** applications

Technical Skills

Languages: Python, Java, C++, TypeScript, JavaScript, SQL, Verilog
Frameworks & Tools: React, Next.js, Node.js, Tailwind CSS, JavaFX, Docker, Kubernetes, Jest, NextAuth, Git
Systems & Infrastructure: REST API Integration, ServiceNow, OpenTelemetry, LDAP, MySQL
Hardware & Engineering: FPGA, Digital Design, Arduino, Signal Processing, Analog Circuit Design
